

TEJAS TEKE

Data Analyst | Python • SQL • Power BI • Machine Learning

+91 8625014941 • tejasteke2001@gmail.com • linkedin.com/in/tejas-teke

PROFESSIONAL SUMMARY

MCA candidate and data analyst with hands-on experience turning raw datasets into business insight — building Power BI dashboards, automating reporting workflows, and developing predictive models in Python. Skilled in data cleaning, exploratory analysis, and translating findings into clear, decision-ready visuals.

SKILLS

- **Data Analysis & Programming:** Python (Pandas, NumPy, Scikit-learn), SQL, PostgreSQL
- **Data Visualization & BI:** Power BI (Power Query, DAX, drill-through reports), MS Excel
- **Machine Learning:** Supervised & unsupervised learning, classification, regression, data preprocessing
- **Core Analyst Skills:** Data cleaning, exploratory data analysis (EDA), dashboard design, KPI tracking, reporting automation
- **Web Technologies:** HTML, CSS
- **Tools & Platforms:** Git, VS Code, IntelliJ IDEA

PROJECT EXPERIENCE

Power BI Sales & Inventory Dashboard | *Independent Project*

- Built interactive Power BI dashboards to track revenue trends, sales performance, and inventory movement in real time, giving stakeholders a single view of key KPIs.
- Cleaned and transformed source data in Power Query and modeled advanced DAX measures for profit margin, stock turnover, and demand trends.
- Automated recurring reports with dynamic visuals and drill-through views, cutting manual report preparation and improving reporting accuracy.

Clinic Performance & Profitability Analysis | *Power BI*

- Analyzed 2,000 dental appointments generating \$937,624 revenue and 20.5% profit margin using Power BI, DAX, and Power Query.
- Identified Chicago's 4.11% margin as the lowest, where average cost was \$456.02 vs \$372.62 overall and waiting time reached 49.2 min.
- Found a \$61,340 NY–LA revenue gap despite similar appointment volumes (556 vs 560), linked to treatment mix: 228 vs 94 whitening appointments, with 39.97% vs 10.09% profit margins for whitening and cleaning.
- Found dentist profitability varied by location, with D5 ranging from 4.11% to 27.44%, challenging simple dentist-level performance comparisons.

Python Data Analysis Projects | *Independent Projects*

- Cleaned and analyzed structured datasets with Pandas and NumPy, running exploratory data analysis to surface patterns, trends, and correlations.
- Built classification and regression models in Scikit-learn to solve predictive problems on structured data.
- Applied normalization, feature scaling, and feature selection, then validated models using accuracy, precision, recall, and error metrics.

Retail Sales & Profitability Analysis | *Independent Project — Python*

- Analyzed 5,901 records across 3,003 orders and 773 customers (2019–2020) using Pandas, uncovering 77% YoY sales growth against only 14% profit growth, exposing a margin erosion trend invisible in top-line revenue.
- Pinpointed root causes at the regional and segment level, including a 62% profit decline in one region despite 80%+ sales growth, and flagged 3 loss-making sub-categories.
- Built a 6-panel visual dashboard in Matplotlib summarizing sales, profit, regional, and category trends to support data-driven decisions.

Amazon Static Webpage — Front-End Project | *Independent Project*

- Developed a responsive HTML/CSS webpage with cross-device layout, clean UI structure, and consistent visual hierarchy.

EDUCATION

Master of Computer Applications (MCA) | IMSCDR, Ahmednagar

Bachelor of Computer Applications (BCA) | Ahmednagar College, Ahmednagar

CERTIFICATIONS & WORKSHOPS

- **Power BI Workshop, Ahmednagar College (2024)** — data modeling, dashboard creation, KPI reporting
- **Python Programming Certification (2023)** — OOP concepts, scripting, data manipulation

ACHIEVEMENTS

- Solved 80+ algorithmic challenges to strengthen logical reasoning and problem-solving speed
- Active participant in technical workshops and coding practice
